# Whitehall Township, Lehigh County Annex

# **Hazard Mitigation Plan Points-of-Contact**

# **Primary:**

Christopher Grim Emergency Manager 3219 MacArthur Road, Whitehall, PA 18052 610-437-5524 cgrim@whitehalltownship.com

### Alternate:

John Rackus Director of Public Works 3219 MacArthur Road, Whitehall, PA 18052 610-437-5524 jrackus@whitehalltownship.com

# **Municipal Profile**

Whitehall Township is a rural-suburban township located in east-central Lehigh County, along the border with Northampton County. The township encompasses a land area of 12.8 square miles, and has a population of 26,738 (2010 Census). Whitehall Township is bordered by; Coplay Borough, Catasauqua Borough, Hanover Township, Northampton Borough, and North Catasauqua Borough (both Northampton County) to the east; the City of Allentown to the south; South Whitehall Township to the west and southwest; and North Whitehall Township to the west and northwest.

Whitehall Township is situated along the western bank of the Lehigh River. The township drains in the Lehigh River, which separates it from Northampton County and Catasauqua Borough. Three tributaries of the Lehigh River drain the township: Spring Creek in the northern-most area, Coplay Creek for the central and majority of the township, and Jordan Creek in the southern area bordering South Whitehall Township and Allentown.

The township's main north-south road is Route 145 (MacArthur Road), which has an interchange with Highway 22 in the southern-most part of the township, and crosses Route 329 in the north. Route 329 runs east-west across the northern part of the township, connecting to Northampton County in the east and North Whitehall Township in the west. In the south, Route 22 crosses east-west through Whitehall Township, connecting points in eastern PA to Allentown, and continuing west through Pittsburgh and beyond. Locally, Mechanicsville Road and Lehigh Street bisect the center of the township, running east-west to points west to South Whitehall Township and east to North Catasauqua Borough (Northampton County), respectively.

# **Municipal Participation**

1. Identify municipal stakeholders to be involved in the planning process such as, floodplain administrator, public works, emergency management, engineers, planners, etc., and include their specific role in the process.

Jack Meyers, Deputy Mayor

Role: Deputy Mayor

Christopher Grim, Emergency Manager

Role:

Carl Lagler, Engineer

Role:

Lee Rackus, Director of Zoning / Development

Role:

John Rackus, Director of Public Works

Role:

- 2. Identify community stakeholders such as; neighborhood groups, religious groups, major employers / businesses, etc., that will be informed and / or involved in the planning process and describe how they will be involved.
- 3. Describe how the public **will be engaged** in the current planning process examples, newsletters, social media, etc., **and how they were engaged** since the 2013 Hazard Mitigation Plan.

The public will be notified via the township newsletter and social media.

**Compliance with the National Flood Insurance Program (NFIP)** 

| Compliance with the National Flood insurance Frogram   | I (NFIP)   |                     |
|--|--|---------------------|
| Topic  | Identify source of information, if different from the one listed.  | Additional Comments |
| 1. Staff Resources   |  |                     |
| Is the Community Floodplain Administrator (FPA) or NFIP Coordinator certified?   | Community FPA  |                     |
| Is floodplain management an auxiliary function?  | Community FPA  |                     |
| Provide an explanation of NFIP administration services (e.g., permit review, GGIS, education or outreach, inspections, engineering capability) | Community FPA  |                     |
| What are the barriers to running an effective NFIP program in the community, if any?   | Community FPA  |                     |
| 2. Compliance History  |  |                     |
| Is the community in good standing with the NFIP?   | State NFIP Coordinator, FEMA NFIP Specialist, or community records |                     |
| Are there any outstanding compliance issues (i.e., current violations)?  |  |                     |
| When was the most recent Community Assistance Visits (CAV) or Community Assistance Contact (CAC)?  |  |                     |
| Is a CAV or CAC scheduled or needed?   |  |                     |

Compliance with the National Flood Insurance Program (NFIP) - continued

| Topic  | Identify source of information, if different from the one listed.                | Additional Comments |
|--|--|---------------------|
| 3. Regulation  |  |                     |
| When did the community enter the NFIP?   | NFIP Community Status Book   |                     |
| Are the Flood Insurance Rate Maps (FIRMs) digital or paper? How are residents assisted with mapping?   | Community FPA  |                     |
| Do floodplain regulations meet or exceed FEMA or State minimum requirements? If so, in what ways?  | Community FPA  |                     |
| Describe the permitting process  | Community FPA, State, FEMA NFIP  |                     |
| 4. Insurance Summary   |  |                     |
| How many NFIP policies are in the community? What is the total premium and coverage? How many claims have been paid in the community? What is the total amount of paid claims? How many substantial damage claims have there been? | State NFIP Coordinator or FEMA NFIP Specialist FEMA NFIP or Insurance Specialist |                     |
| How many structures are exposed to flood risk within the community?  | Community FPA or GIS Analyst   |                     |
| Describe any areas of flood risk with limited NFIP policy coverage   | Community FPA or FEMA Insurance Specialist                                       |                     |
| 5. Community Rating System (CRS)   |  |                     |
| Does the community participate in CRS?   | Community FPA, State, or FEMA NFIP   |                     |
| If so, what is the community's CRS Class Ranking?  | Flood Insurance Manual (http://www.fema.gov/floodinsurancemanual.gov)            |                     |
| What categories and activities provide CRS points and how can the Class be improved?   |  |                     |
| Does the plan include CRS planning requirements?   | Community FPA, FEMA CRS Coordinator, or ISO representative                       |                     |

# **Community Assets**

Community assets are defined to include anything that is important to the character as well as the function of a community, and can be described in four categories, they are; people, economy, natural environment and built environment. Please identify the community assets and location under each category.

## 1. People

• Concentrations of vulnerable populations such as the elderly, physically or mentally disabled, non-English speaking, and the medically or chemically dependent.

Whitehall Township has two nursing homes

# Community Assets - continued

Types of visiting populations where large numbers of people are concentrated such as visitors for special events and students.

Whitehall Township receives a large amount of visitors that are traveling thru the township to get to northern destinations and due to the large shopping centers / malls, we have.

### 2. Economy

Major employers, primary economic sectors such as agriculture and commercial centers where losses would have a severe impact on the community.

Whitehall Township has two major shopping malls and three major shopping centers in the community that would have a severe impact if there were losses. We have a large commercial base.

#### 3. Natural Environment

Those areas / features that can provide protective functions that reduce the magnitude of hazard events such as, wetlands or riparian areas, and other environmental features important to protect.

#### 4. Built Environment

- Existing structures such as, concentrations of buildings that may be more vulnerable to hazards based on location, age, construction type and / or condition of use.
- Infrastructure systems such as water and wastewater facilities, power utilities, transportation systems, communication systems, energy pipelines and storage.

A major pipeline traverses the township from west to east.

- High potential loss facilities such as, dams, locations that house hazardous materials, military and / or civilian defense installations.
- Critical facilities such as, hospitals, medical facilities, police and fires stations, emergency operations centers, shelters, schools and airports / heliports.

1 police station 5 fire stations

1 emergency operations center Whitehall/Coplay School District Campus - K-12 on one large campus

Cultural / historical resources such as, museums, parks, stadiums, etc.

2 historic buildings 3 trail systems

2013 Municipal Action Plan Status

|   |   |                          |             | Status     |           |              |   |
|---|---|--------------------------|-------------|------------|-----------|--------------|---|
|   | Existing Mitigation Action<br>(from 2013 Hazard Mitigation Plan)  | No Progress /<br>Unknown | In Progress | Continuous | Completed | Discontinued | Additional Comments                                 |
| 1 | Norfolk Southern Culvert over Coplay Creek – Engineering and removal of flow restriction from the original 1910 design of the culvert. At present, SR 1010 ADT of 15,000 closes. Water Street homes are without fire services during flooding due to the weight restriction and poor condition of the bridge to the north (SR 1014) that is the only other access to Water Street. 5 businesses in the area of Eberhart Road must close during times of flooding. | X                        |             |            |           |              |   |
| 2 | Overlook Basin Upgrades at Overlook Road – Upsize the existing outfall piping to keep flows underground to the Jordan Creek. The emergency spillway for this basin uses three township roads and Rt.145 to convey the stormwater to the Jordan Creek during overtop conditions. The roadways are mass transit and school bus routes coupled with high pedestrian traffic; such exposure in this corridor would be eliminated.                                     | X                        |             |            |           |              |   |
| 3 | Whitehall Police Department Emergency Generator replacement/upgrade- Presently the PD emergency generator only provides emergency lighting during power outages. The goal is to replace the generator upgrading to full stand-alone operation of the PD with 24 hours operation of 50 employees.  | X                        |             |            |           |              |   |
| 4 | Sinkhole on Florida Avenue – sinkhole remediation to protect infrastructure, which has caused substantial damage to one residential structure and threatens neighboring homes, streets and infrastructure.  |                          |             |            | X         |              | Action not carried through to the 2018 Action Plan. |
| 5 | Traffic/Evacuation/Emergency Route flooding   | X                        |             |            |           |              |   |
| 6 |   |                          |             | Χ          |           |              |   |
| 7 | Work with PennDOT to conduct additional studies of the impacts of removing the 5th Street bridge, which is adjacent and parallels SR 1015.  |                          |             | Χ          |           |              |   |
| 8 | Work with Lehigh County EMA to install backup power at the Whitehall Township Authority, 1901 Schadt Avenue. This project part of the Lehigh Countywide Generator Project, funded through 2008 LPDM.  |                          |             |            | X         |              | Action not carried through to the 2018 Action Plan. |

|---|---|-------------------------------------|------------------------|-------------------------|---|--|--|----------------------------|---|
| , | Continue to support the implementation, monitoring, maintenance, and updating of this Plan, as defined in Section 7.0 | All<br>Categories                   | All Hazards            | High                    | Low –<br>High (for<br>5-year<br>update) | Municipal Budget, possibly FEMA Mitigation Grant Funding for 5-year update | Municipality (via mitigation planning point of contacts) with support from Planning Partners (through their Points of Contact), PEMA | Ongoing                    | New &<br>Existing                           |

#### Notes:

#### **Estimated Costs:**

- Where actual project costs have been reasonable estimated: Low = < \$10,000; Medium = \$10,000 to \$100,000; High = > \$100,000;
- Where actual project costs cannot reasonably be established at this time:

**Low** = Possible to fund under existing budget. Project is part of, or can be part of an existing on-going program.

**Medium** = Could budget for under existing work plan, but would require a reapportionment of the budget or a budget amendment, or the cost of the project would have to be spread over multiple years.

**High** = Would require an increase in revenue via an alternative source (i.e., bonds, grants, fee increases) to implement. Existing funding levels are not adequate to cover the costs of the proposed project.

### Potential Funding (FEMA HMA):

- BRIC = Building Resilient Infrastructure and Communities
- **FMA** = Flood Mitigation Assistance Grant Program
- **HMGP** = Hazard Mitigation Grant Program
- **HSGP** = Homeland Security Grant Program
- **EMPG** = Emergency Management Performance Grant

### **Implementation Schedule:**

- Short Term = 1 to 5 years
- **Long Term** = 5 years or greater
- **DOF** = Depending on Funding

### Applies to New and/or Existing Structures:

- N/A = Not Applicable
